

## **A Galilean adventure**

Rediscover the neighborhood of the King of Planets! During this tour, you will have the opportunity to land on the moons Io, Europa, Ganymede, and Callisto. We provide views such as making a snowman out of freshly fallen sulfur on Io, the seafloor of Europa, impact craters on Ganymede and Jupiter admired from a hotel on Callisto, placed at a safe distance from the Gas Giant.

Journey time: 21 days

Cost: 800 Euro Sponges

### **What we will visit:**

Jupiter's poles

Io, Europe, Ganymede, and Callisto

### **What we will see:**

The most powerful auroras in the solar system

Sulfur seas on the moon Io

The Great Red Spot - Jupiter's powerful Anticyclone

### **What awaits you during the flight?**

During the flight, you can look forward to a number of activities, including:

Advanced VR pods, where you can feel like you are on Earth at any time - should there be a longing for it on the way.

"Og" acrobatics shows - only with us will you see skilled acrobats able to use the full potential of the state of inertia in an unparalleled display!

A gym is also available on board our ship so that you have the opportunity to take care of your physical fitness.
