

In the footsteps of Voyager 2

This is the route taken by an unmanned space probe sent by NASA in 1977. During our expedition, we will visit as many as 4 planets of the Solar System. We will delve into the history of the Voyager mission, but also other fascinating missions from the second half of the 20th century.

Journey time: 3 months

Cost: 2000 Euro Sponges

What we will visit:

Jupiter

Moon Io

Saturn

Titan

Uranus

Neptune

What awaits you during the flight?

The flight takes up a large part of the trip, so you will have the opportunity to enjoy our attractions during the flight.

Astronomical observatory - the surrounding darkness and passing objects at such close range are ideal conditions for observing. You will be able to observe our near and far cosmos under the guidance of a qualified astronaut.

Relaxation room with VR technology - the surrounding darkness can sometimes overwhelm us, which is why you have the opportunity to use the relaxation rooms on board our ship, where you will be able to transport yourself to your favorite place on Earth thanks to VR technology.

A gym is also available on board our ship so that you have the opportunity to take care of your physical fitness.
