

Hot climates in the solar system

This excursion is primarily aimed at lovers of incredible experiences and tropical climates. On this trip you will visit the planets Mercury and Venus, where the extreme temperatures will have everyone spellbound! You will have the opportunity to spend time in Hotels unique to the entire solar system - a wandering hotel on Mercury and a flying city in the higher layers of Venus' atmosphere.

Travel time: 7 days

Cost: 500 Euro Sponges

What we will visit:

The higher layers of the Venusian atmosphere

Craters of the creators of all time

What we provide:

Views of the hottest planets in the solar system

Tropical habitats created inside both Hotels

Undisturbed relaxation in a sky city

Constantly new views at the Nomad Hotel

During the flight we provide comfortable cabins and qualified staff who will answer all questions from you about the flight as well as the landscapes you see.
